# ABOUT THE EVENT

The International Rice & Grains Tech Expo is the platform between the Grains Technology Sector and the Grains Industry. The show unveils the latest manufacturing technologies and solutions which would enable large industries and other small and medium enterprises to leverage and enhance their manufacturing capabilities.

The industry has grown with newer and bigger companies, both Indian & International companies have entered the markets. The expo will cover Rice & Grains manufacturing machines and other technologies essential for today's manufacturing.

## WHY HYDERABAD, INDIA ?

Telangana emerged as India's No. 1 rice-producing state, harvesting a record 168.75 LMT, which accounts for 12.5% of the nation's total rice output. Strong kharif and rabi yields across 46.85 lakh hectares pushed the state ahead

India's 2024-25 foodgrain output has reached an all-time high of 354 million tonnes, driven by bumper crops of rice, wheat, maize, pulses, and oilseeds, thanks to pro-farmer policies, higher MSPs, and timely input support.

India's Agri Sector on Track to Hit \$1.4 Trillion by 2035, With 5% annual growth, India's agriculture sector—currently valued at \$580–650 billion—is set to more than double by 2035. Growth is powered by digital innovation, structural reforms, and rising demand for processed and high-value agri products.

India's agri exports hit \$50.2B in FY24 with targets of \$100B by 2030. Rapid growth in bioeconomy (\$165B in 2024), agrochemicals, and agri-biologicals signal strong opportunities for investors and innovators in the agri value chain.
